
GLASS EFFECT TAMBOUR DOORS
RAUVOLET crystal-line

RAUVOLET CRYSTAL-LINE

The smart glass tambour door.

Ample storage space. High-quality appearance. Modern look. All this and more is part of RAUVOLET crystal-line as it combines the advantages of real glass with those of polymers. This tambour door is more break-resistant, scratch-resistant and lighter than real glass, with the added benefit of a sleeker and more refined design and appearance. A strong mix for modern interior design, regardless of whether it is incorporated in kitchens, living rooms or even in shop fitting.

RAUVOLET crystal-line features excellent running properties and can be easily and conveniently installed like all tambour door systems from REHAU.

With 50 mm-wide slats made of polymer glass laminate, RAUVOLET crystal-line creates a harmonious and two-dimensional front.

This produces an impressive appearance, which perfectly merges with the surface both in high-gloss or matt finish.

THE CRYSTAL COORDINATION GUIDE

Product advantages

A kitchen front in total seamless integration – something that can only be achieved with the right surfaces. This is now possible thanks to the well-thought-out crystal coordination guide. Kitchen front and tambour door can be combined in perfect harmony regardless of whether it is in matt or high gloss. Ideal for even small corner spaces.

RAUVOLET CRYSTAL-LINE
